Contents of Volume 36

Key to Sections:
1. Circulation
2. Respiration
3. Renal & Electrolyte Physiology
4. Gastrointestinal Physiology
5. Endocrinology & Metabolism
6. Environmental Physiology & Exercise
7. Comparative Physiology
8. General Physiology
9. Neurobiology
10. Hematology
11. Muscle Physiology

No. 1. JANUARY 1974

SECTION			PAGE
2	Respiratory response to cyanide in fetal sheep after peripheral chemodenervation.	*A. H. Jansen and V. Chernick*	1
2, 6	Genetic differences in the ventilatory response to inhaled CO_2.	*W. W. Arkinstall, K. Nirmel, V. Klissouras, and J. Milic-Emili*	6
2, 9	Carotid baroreceptor modulation of diaphragm and abdominal muscle activity in the cat.	*B. Bishop*	12
1	Effects of altered venticular load on the Walton-Brodie strain gauge arch.	*N. W. Robie and W. H. Newman*	20
1, 8, 10	Effect of isovolemic anemia on ventricular performance at rest and during exercise.	*J. A. Rodriguez, G. A. Chamorro, and E. Rapaport*	28
1, 2, 6	Heart and lung function at rest and during exercise in adolescence.	*J. E. Seely, C. A. Guzman, and M. R. Becklake*	34
2	Effects of DPL at mercury/water interfaces and estimation of lung surface area.	*B. A. Hills*	41
2, 6, 8	Arterial blood gases in man during inert gas narcosis.	*P. B. Bennett and G. D. Blenkarn*	45
2	Cyclic variation of rate of carbon monoxide production in normal women.	*M. Delivoria-Papadopoulos, R. F. Coburn, and R. E. Forster*	49
1	Ouabain tolerance and heart rate in dogs with sinus rhythm and induced atrial fibrillation.	*L. I. Bouchek, K. J. Graham, and R. P. Anderson*	52
1, 2	Effect of oxygen on perfusion and metabolism of the ischemic myocardium.	*K. Ishikawa, T. Lee, and W. Ganz*	56
2	Redistribution of alveolar ventilation following pulmonary thromboembolism in the dog.	*S. E. Levy and D. H. Simmons*	60
1	Mechanical properties of the isolated canine pericardium.	*S. Rabkin, D. G. Berghause, and H. F. Bauer*	69
2	Ventilation-perfusion relationships as assessed by $aADN_2$ in hyaline membrane disease.	*A. J. S. Corbet, J. A. Ross, P. H. Beaudry, and L. Stern*	74
6	Sweat rate and concentration of chloride in hand and body sweat in desert walks: male and female.	*M. K. Yousef and D. B. Dill*	82
1	Organ blood flow during pulsatile cardiopulmonary bypass.	*J. K. Boucher, L. W. Rudy, Jr., and L. H. Edmunds, Jr.*	86
2, 6	Use of arterial P_{O_2} to study convective and diffusive gas mixing in the lungs.	*L. R. Johnson and H. D. Van Liew*	91
2	Respiratory mechanics in the unanesthetized dog.	*D. J. Gillespie and R. E. Hyatt*	98
1, 2, 7	Gas exchange in the immature lung. I. Anatomical shunt in the premature infant.	*C. R. Parks, D. E. Woodrum, E. R. Alden, T. S. Standaert, and W. E. Hodson*	103
1, 2, 7	Gas exchange in the immature lung. II. Methods of estimation and maturity.	*C. R. Parks, E. R. Alden, D. E. Woodrum, T. S. Standaert, and W. E. Hodson*	108

SPECIAL COMMUNICATIONS

1, 6	Cardiac function during heat and supine cycling examined with a new noninvasive technique (CED).	*H. Galbo and P.-E. Paulev*	113
1, 2	Chronically implanted tissue oxygen electrodes in rabbits.	*J. M. Norton and P. W. Rand*	118
1, 11	Elastic and viscous stiffness of the canine left ventricle.	*G. H. Templeton and L. R. Nardizzi*	123
11	A novel instrument for dynamic and static measurement of large length changes in muscle.	*S. R. Goldstein, W. S. Friauf, and J. B. Wells*	128
2	A comparison of some methods for measuring total respiratory resistance.	*N. A. Bergman and C. L. Waltemath*	131

No. 2. FEBRUARY 1974

2	Simultaneous quasi-static lung pressure-volume curves and "closing volume" measurements.	*R. H. Ingram, Jr., C. F. O'Cain, and W. W. Fridy, Jr.*	135
6	Physiological responses to one- and two-leg exercise breathing air and 45% oxygen.	*C. T. M. Davies and A. J. Sargeant*	142
6	Core temperature response of rats during exposure to oxygen at high pressure.	*C. D. Puglia, E. M. Glauser, and S. C. Glauser*	149

SECTION		PAGE
5	Oxytocin reproducing reflex milk ejection in lactating women. *N. L. Sala, E. C. Luther, J. C. Arballo, and J. C. Cordero Funes*	154
1, 11	Intermittent exercise: arterial lipid substrates and arteriovenous differences. *J. Keul, G. Haralambie, and G. Trittin*	159
5, 6	Cold adaptation by short daily cold exposures in the young pig. *G. Heldmaier*	163
1, 6	Cardiac output during exercise in sea-level residents at sea level and high altitude. *J. A. Vogel, L. H. Hartley, J. C. Cruz, and R. P. Hogan*	169
1, 6	Cardiac output during exercise in altitude natives at sea level and high altitude. *J. A. Vogel, L. H. Hartley, and J. C. Cruz*	173
1, 2, 6	Metabolic and cardiorespiratory responses to long-term work under hypoxic conditions. *B. M. McManus, S. M. Horvath, N. Bolduan, and J. C. Miller*	177
5, 6	Adaptations in man's adrenal function in response to acute cold stress. *J. E. Wilkerson, P. B. Raven, N. W. Bolduan, and S. M. Horvath*	183
2	Interaction between chemical factors and duration of apnea following lung inflation. *M. Younes, P. Vaillancourt, and J. Milic-Emili*	190
2	Diffusion in closed-circuit equilibration curves in obstructive lung disease. *D. W. Shirley and R. F. Johnston*	202
2	Demand-controlled liquid ventilation of the lungs. *T. H. Shaffer and G. D. Moskowitz*	208
3, 6	Enzyme blood levels and water balance during a marathon race. *A. Magazanik, Y. Shapiro, D. Meytes, and I. Meytes*	214
6, 11	Integrated electromyography of quadriceps femoris muscle at different exercise intensities. *J. Henriksson and F. B. Petersen*	218
1, 5, 8	Inhibition of transport of ^{47}Ca and ^{85}Sr by lanthanum in canine cortical bone. *G. R. Paradis, J. B. Bassingthwaighte, and P. J. Kelly*	221
1, 2, 6	Cardiovascular response to apneic immersion in cool and warm water. *L. Folinsbee*	226
2	Carbon dioxide transfer rate in artificial lungs. *M. T. Snider, P. D. Richardson, L. I. Friedman, and P. M. Galletti*	233

SPECIAL COMMUNICATIONS

2, 11	Analog computation of alveolar pressure and airway resistance during maximum expiratory flow. *N. Zamel, J. G. Jones, S. M. Bach, Jr., and L. Newberg*	240
1, 2	Cardiac output in the conscious rabbit: an analysis of the thermodilution technique. *D. J. Warren and J. G. G. Ledingham*	246
6	Multichannel temperature and heart rate radio-telemetry transmitter. *E. N. Smith*	252
9	Controlled stimulation of hair follicle receptors. *N. H. Sabah*	256
1, 3	Nonfiltering nontransporting kidney obtained by tubule blockade with oil. *J. Sadowski*	258
3	Evaluation of the constant-infusion technique to determine inulin clearance in the rat. *H. J. DiMeola, N. J. Siegel, J. M. Kaufman, and J. P. Hayslett*	261
2	A reevaluation of the interrupter technique for airway resistance measurement. *A. C. Jackson, H. T. Milhorn, Jr., and J. R. Norman*	264
5	Measurement error inherent in the determination of hepatic glucose balance. *R. N. Bergman and S. P. Azen*	269

No. 3. MARCH 1974

1, 2	Pulmonary vascular pressures and capillary blood volume changes in anesthetized cats. *C. E. Vreim and N. C. Staub*	275
1, 2	Transient respiratory response to mechanical loads at fixed blood gas levels in rats. *F. H. Orthner and W. S. Yamamoto*	280
6	Effect of carbon monoxide and peroxyacetyl nitrate on man's maximal aerobic capacity. *P. B. Raven, B. L. Drinkwater, R. O. Ruhling, N. Bolduan, S. Taguchi, J. Gliner, and S. M. Horvath*	288
2, 6	Regional lung function in natives and long-term residents at 3,100 m altitude. *A. Dawson and R. F. Grover*	294
6	Responses to exercise in a hot environment as related to the menstrual cycle. *C. L. Wells and S. M. Horvath*	299
5, 6	Hepatic and renal gluconeogenesis in rats acclimatized to high altitude. *L. C. Ou*	303
1, 11	Changes in left ventricular wall thickness during the cardiac cycle. *W. G. Guntheroth*	308
6	Efficiency of evaporative cooling from wet clothing. *F. N. Craig and J. T. Moffitt*	313
2	Static and dynamic properties of cat lung in relation to temperature. *T. Horie, R. Ardila, and J. Hildebrandt*	317
6, 8, 11	Effect of bed rest and exercise on body balance. *R. F. Haines*	323
1, 2	Blockade of acute hypoxic pulmonary hypertension by endotoxin. *J. T. Reeves and R. F. Grover*	328
1, 6	Studies during open-heart surgery on the special characteristics of rectal temperature. *G. W. Molnar and R. C. Read*	333
5, 6	Reduction by moderate hypoxia of the calorigenic action of catecholamines in dogs. *C. M. Blatteis and L. O. Lutherer*	337
1, 3, 6	Effects of positive acceleration ($+G_z$) on renal function and plasma renin in normal man. *M. Epstein, S. J. Shubrooks, Jr., L. M. Fishman, and D. C. Duncan*	340
1, 3, 6	Effects of an anti-G suit on the hemodynamic and renal responses to positive ($+G_z$) acceleration. *S. J. Shubrooks, Jr., M. Epstein, and D. C. Duncan*	345

SECTION			PAGE
5, 9	Suckling pressure in humans: relationship to oxytocin-reproducing reflex milk ejection. *E. C. Luther, J. C. Arballo, N. I. Sala, and J. C. Cordero Funes*		350
2	Airway resistance: a fluid mechanical approach.	*M. Y. Jaffrin and P. Kesic*	354
1, 6	Reduction of maximal exercise heart rate at altitude and its reversal with atropine. *L. H. Hartley, J. A. Vogel, and J. C. Cruz*		362
2, 6, 8	Equilibrium of force of subpleural alveoli: implications to lung mechanics.	*E. Flicker and J.-S. Lee*	366

SPECIAL COMMUNICATIONS

1, 2, 3	Correction of recirculation in regional blood flow studies by residue detection.	*A. Maseri*	375
1	Common left coronary cannula not requiring dissection for use in the dog.	*R. W. Eckstein*	379
1, 11	Three-dimensional mechanics of arterial segments in vitro: methods.	*R. H. Cox*	381
6, 7, 9	Limb immobilization devices for chaired waking monkeys.	*D. G. Mountjoy and M. A. Baker*	385
1	Conscious dog preparation for the production of controlled afterload to the right ventricle. *D. Garner, M. M. Laks, and J. Beazell*		387
5, 6, 8	A rapid and simple procedure for chronic cannulation of the rat jugular vein.	*P. G. Harms and S. R. Ojeda*	391
2, 8, 9	A new approach to quantitation of whole nerve bundle activity.	*D. E. Dick, J. R. Meyer, and J. V. Weil*	393

No. 4. APRIL 1974

6, 11	Muscle metabolites and oxygen deficit with exercise in hypoxia and hyperoxia. *D. Linnarsson, J. Karlsson, L. Fagraeus, and B. Saltin*		399
6	Peritoneal clearance of urea and potassium following experimental hypothermia. *J. Patton, W. Doolittle, and M. Hamlet*		403
1, 8	Age-related changes in the mechanics of the aorta and pulmonary artery of man. *E. R. Gozna, A. E. Marble, A. Shaw, and J. G. Holland*		407
2	Morphologic basis of pulmonary resistance in the human lung and effects of aging. *D. E. Niewoehner and J. Kleinerman*		412
1, 6	Heat acclimation and decline in sweating during humidity transients. *R. R. Gonzalez, K. B. Pandolf, and A. P. Gagge*		419
2	Influence of lung inflation on respiratory control in neonates.	*A. Olinsky, M. H. Bryan, and A. C. Bryan*	426
1	Resting levels of blood fibrinolysis in hyperlipoproteinemia.	*P. Brakman, T. Astrup, R. I. Levy, and D. S. Fredrickson*	430
3, 5	Effect of high fluid intake on the renal concentration mechanism of normal man. *C. A. Vaamonde, J. I. Pressor, and W. Clapp*		434
6, 8, 11	Metabolic cost of walking at different speeds with patellar tendon-bearing prosthesis. *S. Ganguli, S. R. Datta, B. B. Chatterjee, and B. N. Roy*		440
6	Metabolism and heat losses of resting man in a hyperbaric helium atmosphere. *J. Timbal, H. Vieillefond, H. Guenard, and P. Varene*		444
2, 6	Interaction between effects of beta blockade and cigarette smoke on airways.	*E. Zuskin, C. A. Mitchell, and A. Bouhuys*	449
5, 6	Hypoxia and shivering thermogenesis in cold-acclimatized miniature pigs.	*C. M. Blatteis and T. M. Gilbert*	453
2	Cardiodynamic hyperpnea: hyperpnea secondary to cardiac output increase. *K. Wasserman, B. J. Whipp, and J. Castagna*		457
6	Energy exchanges of swimming man.	*E. R. Nadel, I. Holmér, U. Bergh, P.-O. Åstrand, and J. A. J. Stolwijk*	465
1, 6	Heart rate responses of young and old rats to various levels of exercise. *R. J. Barnard, H. W. Duncan, and A. T. Thorstensson*		472
2, 6, 11	Integrated EMG and oxygen uptake during dynamic contractions of human muscle. *B. Bigland-Ritchie and J. J. Woods*		475
2	Hypoxic-hypercapnic interaction in human respiratory control.	*G. D. Swanson and J. W. Bellville*	480

SPECIAL COMMUNICATIONS

2, 6, 8	A closing volume bolus method using SF_6 enhancement of the nitrogen glow discharge. *L. A. Newberg and J. G. Jones*		488
2	Phase compensation of Fleisch pneumotachographs.	*S. M. Yamashiro, S. K. Karuza, and J. D. Hackney*	493
1	Assessment of absolute volume from diameter of the intact canine left ventricular cavity.	*H. Suga and K. Sagawa*	496
3	A simple radioisotopic technique for the study of urate transport in the rat kidney. *R. G. Abramson, M. F. Levitt, J. K. Maesaka, and J. H. Katz*		500
1	A method for continuously monitoring blood volume.	*J. L. Leonard and P. H. Abbrecht*	506
6	"Live-in" exercise drums for small animals.	*M. E. Jenness and R. J. Byrd*	509
6, 11	A thermistor probe for myothermal measurements in man.	*R. H. T. Edwards, M. J. McDonnell, and D. K. Hill*	511

No. 5. MAY 1974

SECTION		PAGE
1, 2, 6	Maximal oxygen uptake during arm cranking and combined arm plus leg exercise. *N. H. Secher, N. Ruberg-Larsen, R. A. Binkhorst, and F. Borde-Petersen*	515
3, 5, 6	Plasma renin activity after acute heat exposure in nonacclimatized and naturally acclimatized man. *J. P. M. Finberg, M. Katz, H. Gazit, and G. M. Berlyne*	519
1, 4, 7	Regional circulatory adjustments to eating and digestion in conscious unrestrained primates. *S. F. Vatner, T. A. Patrick, C. B. Higgins, and D. Franklin*	524
7	Anesthetic potency (MAC) of nitrous oxide in the dog, cat, and stump-tail monkey. *E. P. Steffey, J. R. Gillespie, J. D. Berry, E. I. Eger II, and E. S. Munson*	530
2	Conditions for reduction of pulmonary gas transfer by ventilation-perfusion inequality. *J. W. Evans, P. D. Wagner, and J. B. West*	533
1, 6, 11	Effects of metabolic hyperthermia on performance during heavy prolonged exercise. *J. D. MacDougall, W. G. Reddan, C. R. Layton, and J. A. Dempsey*	538
6	Effect of terrain on the energy cost of walking with back loads and handcart loads. *M. F. Haisman and R. F. Goldman*	545
1, 2, 6	Physiological response to pregnancy at rest and during exercise. *H. G. Knuttgen and K. Emerson, Jr.*	549
2	Influence of constriction in central or peripheral airways on maximal expiratory flow rates in dogs. *A. J. Gardiner, L. Wood, P. Gayraro, H. Menkes, and P. Macklem*	554
1, 6, 8	Hypoxemia, pulmonary hypertension, and low cardiac output in newcomers at low altitude. *F. Sime, D. Peñaloza, L. Ruiz, N. González, E. Covarrubias, and R. Postigo*	561
6	Heat tolerance of exercising lean and heavy prepubertal girls. *E. M. Haymes, E. R. Buskirk, J. L. Hodgson, H. M. Lundegren, and W. C. Nicholas*	566
6	Thermal responses during training in a temperate climate. *E. Shvartz, A. Magazanik, and Z. Glick*	572
6	Metabolic and thermal responses of women during cooling in water. *J. Kollias, L. Barlett, V. Bergsteinova, J. S. Skinner, E. R. Buskirk, and W. C. Nicholas*	577
1, 3, 8	Transynovial exchange of small molecules in normal human subjects. *P. A. Simkin and J. E. Pizzorno*	581
1, 2	Measurement of continuous distributions of ventilation-perfusion ratios: theory. *P. D. Wagner, H. A. Saltzman, and J. B. West*	588

Subject Index to Volume 36

Acceleration
  + G_z, after simulated weightlessness, 745
  hemodynamic and renal effects of anti-G suit, 345
  renal function and plasma renin, 340
Acclimatization, altitude, 173
  cardiopulmonary response, 561
  hepatic and renal gluconeogenesis, 303
Acclimatization, cold, hypoxia and shivering thermogenesis, 453
Acclimatization, heat
  decline in sweating during humidity transients, 419
  plasma renin activity, 519
Acid-base balance, emphysema, 668
Adaptation, cold, 163
Adolescence, heart and lung function, 34
Adrenal gland, cold stress, 183
β-Adrenergic blockade, cigarette smoking, 449
Aerobic capacity, maximal, CO and peroxyacetyl nitrate, 288
Aging
  changes in mechanics of aorta and pulmonary artery, 407
  exercise heart rates, 472
  morphologic basis of pulmonary resistance, 412
  sweat rate and chloride concentration, 82
Airway
  beta blockade and smoking, 449
  collapse of, and supramaximal expiratory flows, 653
  constriction and maximal expiratory flow, 554
Airway resistance
  during maximum expiratory flow, 240
  fluid mechanical approach, 354
  interrupter technique for measurement, 264
Altitude
  cardiac output during exercise, 169, 173
  cardiopulmonary response, 561
Altitude, high
  maximal exercise heart rate and atropine, 362
  regional lung function, 294
Alveoli, subpleural, mechanics, 366
Amino acids, free, intracellular concentration in muscle, 693
Ammonia distribution between blood and CSF in emphysema, 668
Anemia, isovolemic, ventricular performance, 28
Anesthesia, pulmonary capillary blood volume, 275
Anesthetic potency, nitrous oxide, 530
Aorta, age-related mechanical changes, 407
Apnea
  after lung inflation, chemical factors, 190
  water temperature in diving, 226
Apparatus: *see* Methods and instrumentation
Arrhythmias, ouabain tolerance and heart rate, 52
Artery
  blood gases during inert gas narcosis, 45
  pulmonary, age-related mechanical changes, 407
Atrium, right, instantaneous dimensional changes, 686
Atropine, maximal exercise heart rate at altitude, 362

Baroreceptors
  control of respiratory muscles, 12
  exercise, 679
Bed rest, body balance, 323
Body balance, bed rest and exercise, 323
Body composition, metabolic and thermal responses to cooling in water, 577
Body mass, lean, maximal oxygen uptake, 757
Blood
  ammonia distribution in emphysema, 668
  measurement of foreign gas mixtures, 600
Blood flow: *see also* Circulation
  during pulsatile perfusion, 86
  skin, thermoregulation, 726
Blood gases, arterial, during inert gas narcosis, 45
Blood volume, pulmonary capillary, 275
Bone, lanthanum inhibition of ^{47}Ca and ^{85}Sr transport in, 221
Bronchoconstriction, maximal expiratory flow, 554
Bypass, pulsatile cardiopulmonary blood flow, 86

Calorigenesis, catecholamine, hypoxic reduction, 337
Carbon dioxide
  transfer rate in artificial lungs, 233
  ventilatory response, 6
Carbon monoxide
  cyclic production in women, 49
  maximal aerobic capacity, 288
Cardiac function, exercise, 113
Cardiac output
  altitude acclimatization, 561
  exercise, 142, 169, 173
  hyperpnea secondary to increase in, 457
  thermodilution, 246
Cardiorespiratory function, specificity of training, 753
Carotid sinus, baroreceptor control of respiratory muscles, 12
Catecholamines, hypoxic reduction of calorigenic action, 337
Cerebrospinal, fluid, ammonia distribution in emphysema, 668
Chemodenervation, peripheral, fetal respiratory response to cyanide, 1
Children, heat tolerance and exercise, 566
Chloride concentration in sweat, 82
Cigarette smoking: *see* Smoking
Circulation: *see also* Blood flow
  adjustments to eating and digestion, 524
  pulmonary and bronchial, accessibility of pulmonary stretch receptors, 706
Cold
  acclimatization, 453
  adrenal function, 183
  Metabolic and thermal responses, 577
Cooling, evaporative, from wet clothing, 313
Cyanide, respiratory response to, in fetuses after peripheral chemodenervation, 1

Dehydration, venous to body hematocrit, 608
Diaphragm
  carotid baroreceptor control, 12
  effect of contractions of, on rib cage, 715
Dipalmitoyl lecithin at mercury/water interfaces, 41
Diving
  apneic, water temperature, 226
  metabolic and thermal responses, 577
  to xiphoid in seated man regional lung volumes, 734

Eating, regional circulatory adjustments after, 524
Edema, pulmonary, parenchymal tissue changes, 648
Electromyography, exercise intensity, 218
Emphysema
  blood and CSF ammonia, 668
  flow limitation in forced expiration, 737
Endotoxin, blockade of hypoxic pulmonary hypertension, 328
Energy cost, exercise and terrain, 545
Energy exchange, swimming, 465
Exercise
  body balance, 323
  cardiac function, 113
  cardiac output, 169, 173
  electromyography, 218
  energy cost and terrain, 545
  energy exchanges, 465
  enzyme blood levels and water balance, 214
  heart and lung function during exercise, 34
  heart rate, 472
  heat tolerance in prepubertal girls, 566
  intermittent, arterial lipid substrates and arteriovenous differences, 159
  long term, in hypoxia, 177
  maximal heart rate at altitude and atropine, 362
  maximal oxygen uptake, 515, 711
  maximal treadmill, protocols, 720
  mean skin temperature, 625
  menstrual cycle and heat stress, 299
  metabolic cost, 440
  metabolic hyperthermia, 538
  muscle metabolites and oxygen deficit in hypoxia and hyperoxia, 399
  one- and two-leg, while breathing air and 45% oxygen, 142
  oxygen uptake, 618
  pregnancy, 549
  response to air pollutants, 288
  rowing mechanics, 642
  sinoaortic reflexes, 679
  specificity of training, 753
  ventricular performance in isovolemic anemia, 28

Exercise—*Continued*
Expiratory flow, supramaximal, airway collapse, 653

Fetus, respiratory response to cyanide, 1
Fibrinolysis, blood, hyperlipoproteinemia, 430
Fitness, maximal oxygen uptake based on lean body mass, 757
Fluid intake, renal concentrating ability, 434

Gas exchange
immature lung, 103, 108
respiratory, mixing patterns, 698
ventilation-perfusion inequality, 533
Genetics, ventilatory response to CO_2, 6
Glomerular filtration rate, constant infusion technique, 261
Gluconeogenesis, hepatic and renal, high altitude acclimatization, 303
Glucose, hepatic balance, 269

Heart: *see also* entries under Cardiac
function during exercise in adolescence, 34
Heart rate
apneic immersion, 226
exercise, 472
maximal, at altitude, atropine, 362
ouabain tolerance, 52
thermoregulation, 726
Heat
exercise and the menstrual cycle, 299
plasma renin activity, 519
sweat rate and chloride concentration, 82
Heat balance
evaporative cooling from wet clothing, 313
in hyperbaric helium atmosphere, 444
Heat tolerance, exercising prepubertal girls, 566
Helium, heat balance in hyperbaric atmosphere, 444
Hematocrit, venous to body, dehydration, 608
Hemodynamics, effects of anti-G suit during acceleration, 345
Humidity transients, heat acclimation, 419
Hyaline membrane disease, ventilation-perfusion relationships, 74
Hypercapnia, interaction with hypoxia in respiratory control, 480
Hyperlipoproteinemia, blood fibrinolysis, 430
Hyperoxia, muscle metabolites and oxygen deficit with exercise, 399
Hyperpnea, cardiodynamic, 457
Hypertension
hypoxic pulmonary endotoxin blockade, 328
pulmonary, altitude acclimatization, 561
Hyperthermia, metabolic, exercise, 538
Hypothermia, peritoneal clearance of urea and potassium after, 403
Hypoxemia
altitude acclimatization, 561
ventilation-perfusion ratio, 588
Hypoxia
endotoxin blockade of pulmonary hypertension, 328
interaction with hypercapnia in respiratory control, 480
long term work, 177
muscle metabolites and oxygen deficit with exercise, 399
reduction of catecholamine calorigenesis, 337
shivering thermogenesis in cold acclimatization, 453

Inflation reflex in neonates, 426
Insulation, thermal body, obesity, 674
Inulin clearance, 261
Isovolume-pressure-flow curves, 737

Kidney
acceleration, 340
effects of anti-G suit on responses to acceleration, 345
gluconeogenesis in high altitude acclimatization, 303
high fluid intake and concentrating ability of, 434
nonfiltering nontransporting, 258

Lactation
oxytocin, 154
suckling pressure, 350
Lanthanum inhibition of ^{47}Ca and ^{85}Sr transport in bone, 221
Lipids, arterial, intermittent exercise, 159
Liver
gluconeogenesis in high altitude acclimatization, 303
glucose balance, 269
Load, mechanical, transient response at fixed blood gas levels, 280
Lung
airway resistance, 354
artificial, CO_2 transfer rate, 233
bronchoconstriction and maximal expiratory flow, 554
chemical factors and apnea after inflation, 190
convection and diffusion in gases in, 91
demand-controlled liquid ventilation, 208
effects of dipalmitoyl lecithin at mercury/water interfaces, 41
endotoxin blockade of hypoxic hypertension, 328
flow limitation in forced expiration, 737
function during adolescence, 34
immature, gas exchange, 103, 108
inflation reflex in neonates, 426
obstructive disease, diffusion in closed circuit equilibration, 202
parenchymal tissue changes in edema, 648
pressure-volume curves and "closing volume," 135
pulmonary resistance and aging, 412
reduction of gas transfer by ventilation-perfusion inequality, 533
regional functions at high altitude, 294
regional volumes in immersion to xiphoid in seated man, 734
subpleural alveolar mechanics, 366
temperature and pressure-volume curves, 317
vascular pressures and capillary blood volume, 275
Lung volume, paralysis, 614

Menstrual cycle
CO production, 49
exercise in heat, 299
Mercury/water interfaces, effects of dipalmitoyl lecithin at, 41
Methods and instrumentation
alveolar pressure and airway resistance, 240
animal exercise drums, 509
assessment of oxygen uptake in exercise, 618
cardiac function examined by noninvasive technique, 113
chronic jugular cannulation, 391
chronically implanted tissue oxygen electrodes, 118
closing volume with SF_6 boluses, 488
common left coronary cannula not requiring dissection, 379
continuous blood volume measurement, 506
controlled right ventricle afterload, 387
correction of recirculation in residue detection, 375
determining hepatic glucose balance, 269
drugs and tail-cuff method, 621
dye curve area measurement by planimeter, 611
electrical gradients in student's artificial cell, 769
estimation of mean skin temperature in exercise, 625
implantable ECG transmitter,, 634
indwelling coronary sinus catheter, 769
interrupter technique for airway resistance measurement, 264
intraventricular volume and diameter, 496
inulin clearance, 261
in vitro arterial mechanics methods, 381
limb immobilization devices for chaired waking monkeys, 385
lung volume in paralysis, 614
measurement of foreign gas mixtures in blood, 600
measurement of large length changes in muscle, 128
measuring total respiratory resistance, 131
multichannel data recording on video tape, 761
nomogram for oxygen uptake calculation, 606
nonfiltering nontransporting kidney, 258
on-line dynamic compliance, 629
phase compensation of Fleisch pneumotachographs, 493
quantitation of nerve bundle activity, 393
radioisotopic study of urate transport, 500
solenoid-operated valve box, 765
stiffness of left ventricle, 123
stimulation of hair follicle receptors, 256
temperature and heart rate telemetry transmitter, 252
thermistor probe for myothermal measurements, 511
thermodilution cardiac output, 246
venous to body hematocrit after dehydration, 608
Micturition, sympathetic activity, 637
Muscle
diaphragm and abdominal carotid baroreceptor control, 12

Muscle—*Continued*
integrated EMG and oxygen uptake during dynamic contractions, 475
intracellular free amino acid concentration, 693
large length changes, 128
metabolites in hypoxic and hyperoxic work, 399
Myocardium, oxygen effect in ischemia, 56

Narcosis, inert gas, arterial blood gases during, 45
Newborn, lung inflation reflex, 426

Contents of Volume 37

Key to Sections:
1. Circulation
2. Respiration
3. Renal & Electrolyte Physiology
4. Gastrointestinal Physiology
5. Endocrinology & Metabolism
6. Environmental Physiology & Exercise
7. Comparative Physiology
8. General Physiology
9. Neurobiology
10. Hematology
11. Muscle Physiology

No. 1 JULY 1974

SECTION			PAGE
6, 11	Energetics of swimming in man.	*P. E. di Prampero, D. R. Pendergast, and D. W. Rennie*	1
1, 10	Prophylactic Coumadin and A-V cannula function.	*S. J. Boyd, Jr., M. B. Dennis, R. T. Nogami, J. J. Cole, and B. H. Scribner*	6
2	Effects of inspiratory flow rate on distribution of inspired gas.	*B. Bake, L. Wood, B. Murphy, P. T. Macklem, and J. Milic-Emili*	8
1, 2	Cardiorespiratory response to central cyanide in fetal sheep.	*A. H. Jansen and V. Chernick*	18
6	Physical working capacity of young men of different ethnic groups in Israel.	*Z. Glick and E. Shvartz*	22
1, 2, 6	Cardiopulmonary function in prospective competitive swimmers and their parents.	*G. W. Ness, D. A. Cunningham, R. B. Eynon, and D. B. Shaw*	27
2, 6	Diffusional and metabolic components of nitrogen elimination through the lungs.	*K. Muysers, U. Smidt, G. Von Nieding, H. Krekeler, and K. E. Schaefer*	32
6	Plasma volume changes during acute exposure to a high environmental temperature.	*M. H. Harrison*	38
6	Oxygen deficit and debt in submaximal exercise at sea level and high altitude.	*J. Raynaud, J. P. Martineaud, J. Bordachar, M. C. Tillous, and J. Durand*	43
1, 2, 6	Hemodynamic and respiratory responses compared in swimming and running.	*I. Hólmer, E. M. Stein, B. Saltin, B. Ekblom, and P.-O. Åstrand*	49
6	Body composition, sinking force, and oxygen uptake of man treading water.	*W. von Döbeln and I. Holmér*	55
1, 2, 10	Oxygen delivery following transfusion of stored blood. I. Normal rats.	*J. T. Guy, P. A. Bromberg, E. N. Metz, R. Ringle, and S. P. Balcerzak*	60
1, 10	Oxygen delivery following transfusion of stored blood. II. Acidotic rats.	*J. P. Mondzelewski, J. T. Guy, P. A. Bromberg, E. N. Metz, and S. P. Balcerzak*	64
2	Variability of maximum expiratory flow-volume curves.	*M. Green, J. Mead, and J. M. Turner*	67
2, 6, 8	Effects of hypoxia on peripheral visual response to rapid sustained stimulation.	*J. L. Kobrick*	75
1, 6, 8	Effect of carbon monoxide on cardiac weight as compared to altitude effects.	*D. Penney, M. Benjamin, and E. Dunham*	80
1, 2	Reversal of the perfusion defect in experimental canine lobar pneumococcal pneumonia.	*E. L. Goldzimer, R. G. Konopka, and K. M. Moser*	85
2, 6	Effect of chronic ozone exposure on lung elasticity in young rats.	*D. Bartlett, Jr., C. S. Faulkner II, and K. Cook*	92
6	Effects of hemoglobin reduction on $\dot{V}o_{2\,max}$ and related hemodynamics in exercising dogs.	*D. H. Horstman, M. Gleser, D. Wolfe, T. Tryon, and J. Delehunt*	97
6	Respiratory heat loss at increased core temperature.	*R. de G. Hanson*	103
1, 2, 6	Effect of high ambient pressure on human apneic bradycardia.	*D. Kerem and J. Salzano*	108

CORRIGENDUM x

CORRIGENDUM

Volume 37, August 1974

Page 259: L. C. Maxwell, J. A. Faulkner, and G. J. Hyatt. "Estimation of number of fibers in guinea pig skeletal muscle." Page 259: under METHODS, in paragraph 2, the equations should read

$$Dm = Lf \sin\theta[1 + Lf \cos\theta/(Lm - Lf \cos\theta)] = Lf \sin\theta[Lm/(Lm - Lf \cos\theta)]$$

$$n = Dm/Df^* = Lm\,Lf \sin\theta \cos\theta/Df(Lm - Lf \cos\theta)$$
